Developer Experience | Developer Platforms | Developer Advocacy

SUMMARY

Developer Experience and Developer Platform engineer with 8+ years of full-time software engineering experience, specializing in developer extensibility, SDKs, tooling, client platforms, and developer enablement. Experienced in leading platform initiatives, shaping developer-facing capabilities, and collaborating across engineering, product, design, marketing, and support.

EXPERIENCE

Member Leadership Staff - Product Lead, Developer Platform

Jul 2019 - Jun 2026

Zoho Corporation - Chennai, India

- Led developer platform capabilities for Zoho CRM, including client-side scripting, serverless functions (FaaS), and embeddable UI widgets.
- Drove Developer Experience initiatives across SDKs, tooling, extensibility workflows, and developer APIs.
- Defined and advanced unified SDK, documentation, and client-platform initiatives to improve consistency across developer surfaces.
- Partnered with Product, Engineering, Design, Marketing, and Support on developer-facing platform initiatives.
- Delivered technical workshops and enablement programs for developers and partners.

Systems Engineer

Jun 2018 - Jul 2019

Tata Consultancy Services - Chennai, India

- Migrated a product-data pipeline from batch processing to real-time event-driven processing using Apache Kafka and Apache NiFi.
- Extended SAP Hybris functionality for dynamic product and integration requirements.
- Developed backend integrations supporting enterprise product-data workflows.

Freelance Software Developer

Jun 2016 - Jun 2018

Self-employed - Chennai, India

- Designed and built SaaS applications using Node.js, Express, PostgreSQL, and Redis.
- Developed a WinForms-based pharmacy management system with invoicing and inventory workflows.
- Built a university portal for attendance and timetable management.
